THE BODUM WAY

Our anniversary year

2019 is a very special year for me. Together with my family and employees all over the world we will celebrate that it is 75 years ago since my father decided to found BODUM in Copenhagen. This he did in April 1944 - against all odds so to speak. The war was raging, and it was difficult times in Denmark. Where everything else seemed grey and black, he went out on his own colorful mission. A lot of his ideas from then is still living to day. So let's pour a nice cup of coffee and look back at bit at our history.

Timeless passion for coffee since the early 50s

During the 50s my father got into coffee, and the very first product was MOCCA, the siphon/ vacuum coffee maker. He invented a special filter, which we still use today. After MOCCA came PEBO, which was very successful during the 60s and 70s, especially in Scandinavia. To come full circle we reintroduced MOCCA in an updated version in 2018. Siphon or vacuum coffee makers have never been more popular than they are now and both MOCCA and PEBO are at the very core of the slow-coffee trend.

CHAMBORD - a BODUM icon

In 1974 we introduced our french press bistro model, made in collaboration with the Martin S.E. company - and we were fortunate to introduce the right product at the right place at the right time. Since then people all over the world make their best cup of coffee the "french-press-way". In 1991 we agreed to take over the production from Martin S.E. and the Chambord was born. Now, it's a part of BODUM and one of our biggest icons.

Times flies, but good ideas last

During the 90s, we continued developing better products for kitchen and tabletop - and for brewing the best cup of coffee or tea. Some of our best lines have been our double wall glasses which we will also introduce in durable poly carbonate for out-door use especially. Everything produced in our own factories in Portugal - in one piece, so no welding and no risk of leaking. And as a little surprise we will be reintroducing Grethe Meyer dinnerware from the 60s.

We are looking forward for the next decades. Thank you for the first 75 years.

Anga Korte

ABOUT GOOD DESIGN

This question requires that someone does indeed know and dares to define what good design is and show examples. The problem for the designer and producer would then be approach the concept of “good design” with his products.

At BODUM’s design studio we are not trying to fulfill this concept of good design. Instead we want to give from our perspective of a living and contradictory world, where Mickey Mouse is as important as the collected work of Picasso, where the question what is genuine and false, attractive and ugly, harmonious and discordant, right and wrong, cannot be answered clearly.

In design the simplest things are always the hardest to achieve. A lot of thought goes into finding the best functionality, the best shape, and the best materials. What takes the most thought, however, is discovering what can be left out; how we can make our products even simpler and easier – thus enhancing their sophistication.

In the last few years we have been rewarded for these efforts with numerous design awards from all over the world. While we take great pride in these awards, the loyalty of our customers is far more rewarding. Our customers recognize and love us for who we are – a company that has stuck to its “design follows function” philosophy while reinventing “Modern” for the 21st century.

Thus BODUM Design is not uniform since the inspiration for the shapes and proportions of our products can as easily be from Pythagoras as from certain harmonies in McCartney’s compositions or to make a giant leap from Elizabeth Arden’s lipstick.

“To see a world in a grain of sand and heaven in a wild flower...”

— William Blake

BODUM AG is responsible for the manufacturing and distribution of BODUM® products worldwide. BODUM AG ensures that all BODUM® products meet the highest standards and that only state-of-the-art products find its way into the market. More and more BODUM® products are produced for and on behalf of BODUM AG by BODUM Portuguesa. Since the beginning of BODUM Portuguesa, environment has been a driving force and a major concern in our activity. During almost 30 years of production, BODUM Portuguesa assumed a responsible position towards the surrounding environment but also to the internal working conditions and safety and well-being of the team.

ABOUT BODUM PORTUGUESA

By having production processes that are majorly focused in transforming metal and applying surface treatments to metals, a lot of “environment unfriendly” unitary processes are used and required such as stamping or welding, but the most concerning are those connected to the plating line and degreasing processes.

These production processes consume natural resources, BODUM works to minimize the impacts in:

- Emission of greenhouse gases;
- Emission of other pollutant air streams;
- Emission of pollutants in water;
- Emission of pollutants in soils;
- Risk of industrial accidents;
- Team safety, health and well-being.

This was done by adopting the best available techniques (BAT) as preventive at the source of the pollution emission:

- Training to team in operating, control and contain processes;
- Reducing the number or quantity of hazardous and dangerous materials;
- Equipment and process good-keeping by internal maintenance procedures;
- Optimization of operational conditions and control of processes;
- Reduction of re-processing needs;
- Project and built processes and facilities prevent and contain pollution in its source;
- Good storage of materials to prevent accidents with environmental impact;
- Good storage of materials and production parts to prevent its deterioration;
- Installing containment tanks and isolated floors in risk areas;
- Saving energy in power sources and make the processes energy efficient;
- Introduction of thermal isolation in the whole building and process tank walls to avoid heat loss;
- Isolation of equipments to avoid the noise propagation.
- **Saving water**
- Recycling water – only 20% of the total consume is fresh water;
- Consume control by introducing automatic valves and volume controllers;
- Reducing drag-outs and introduce cascade rinsing between processes;

- Extend the liquid baths life and processes to prevent the treatment need by using filtration, evaporation, ionic exchange techniques;

Because it is impossible to contain all pollutant in its sources, BODUM Portuguesa has installed end processes to treat, reduce or eliminate the pollution charge in its effluents and wastes. On these, we can highlight:

- **Waste Water Treatment Plant**
- All liquid effluents are separated according to their characteristics and treated as in batches;
- All pre-treatments and final treatments are permanently monitored until the admissible values of discharge are achieved;
- The discharge of BODUM lines are connected to a municipal waste water treatment plant that complements the final treatment;
- The sludge generated in the water treatment are de-watered by using recycled air of the pressed air equipments.
- **Waste Classification and Separation**
- All wastes generated in the plant are submitted to a proper separation, classification, handling and storage until there are sent to the destination;
- All waste management is outsourced to licensed entities, meaning the proper destination has as priority the recyclability of the wastes. Only two of the wastes generated at BODUM must be eliminated because the recycling limitations in the market.
- **Air Aspiration System**
- The air aspiration system is connected to all the pollution sources avoiding the pollutants spread inside the plant;
- These systems filter the air before its release to the atmosphere;
- In the plating line, besides the filtration, all the air is washed with water in scrubbers.

In 2008, BODUM Portuguesa had its recognition for all the efforts made and processes developed and implemented along the last decades, by having the Environmental Permit¹ issued by the Portuguese Environment Ministry.

1. The permit is mandatory and directly comes from the EC Directive 2008/1/EC of January 15 (IPPC). According to this permit, BODUM must have a permanent monitoring of the environmental indicators and values so; it is the guarantee of the legislation fulfilling, good practices and procedures.

ABOUT BODUM PLÁSTICO

Taste, not waste

In 2018 we founded a new factory in Aveiro, one hour drive from our main factory in Tondela - the very place where we started our own BODUM production in 1988.

In Aveiro we will focus mainly on producing durable pc products for our outdoor, wine and drinkglasses as well as all our colourful tea and coffeemakers.

We believe that the days of single-use plastics are gone, be it to-go, one-way plast or coffee capsules. Now we are gearing up to sustainability. We believe in taste, not waste.

Our factory in Aveiro is being set up and equipped with the newest, fully automatic machines and the most modern tooling technology. Our durable double wall glasses, travel mugs, bottles and beakers come out in one, single piece – no welding, no leaking.

We see Aveiro as a completely new part of BODUM which will give us a strong and sustainable growth.

ABOUT COFFEE

BODUM was founded in 1944 by Peter Bodum. Launching a new business during the war wasn't easy, and jobs were scarce, but my father sensed it was time to venture out on his own. He was incredibly fortunate to be granted an import license, and by the late 1940s he had achieved great success. As he looked to grow the business, he found new interest in coffee makers. The company's first vacuum/siphon coffee maker, MOCCA, was introduced in the early fifties, but it wasn't until 1958 with the production of the Santos vacuum/siphon Coffee Maker that BODUM® became a household name for quality coffee products, and coffee has been the major product group for BODUM ever since.

In the 1970s we introduced the now iconic French Press, which continues to be BODUM's most popular item. Today, the majority of BODUM® Coffee Makers are produced at our factory in Portugal, where producing the highest quality products as well as environmental responsibility and safe working conditions are of the utmost importance.

— Jørgen Bodum

COFFEE HOUSE STYLE DRINKS

ESPRESSO

An espresso is about 1 to 1.5oz of espresso coffee. It fills about 1/4 to 3/4 of a demitasse. Espresso is made in an espresso machine by quickly forcing steam and boiling water through finely ground coffee.

AMERICANO

Americano is a style of coffee that is prepared by adding hot water to black coffee which result in a similar strength to traditional drip.

CAPPUCCINO

In Italy cappuccino is served in a 6oz cup. The coffee is topped by a dense froth (half foam, half steamed milk) in a ratio of 3:1. Usually the drink is dusted with unsweetened cocoa.

LATTE MACCHIATO

The coffee is slowly poured into an 8oz glass filled with hot, frothed milk. The coffee "stains" the milk and creates a darker layer over the milk. Then it all gets topped off with pure white foam - making a perfect latte macchiato, a three-layer drink.

CAFFE MOCHA

Caffe mocha has been served in Italian-American cafes since the 1950s. It's a combination of equal amounts of coffee, hot chocolate and hot frothed milk. Today the hot chocolate is oftentimes substituted with chocolate syrup. For the ultimate sinners it is topped off with whipped cream.

CAFFE LATTE

Latte is made with coffee and steamed milk in a ratio of 5:1. The coffee is topped with steamed milk then finished with steamed milk foam.

COFFEE BREWING METHODS

FRENCH PRESS

The French Press Coffee Maker is the simplest of all brewing systems, where coarsely ground beans meet hot water right off the boil. The right temperature (92–96°C, 195–205°F) brings the optimal extraction power for the essential oils in the beans to develop their full flavor profile in just four minutes. An easy press on the plunger locks the grinds at the bottom of the glass carafe and stops the brewing process.

Note: For the French Press brewing method, BODUM recommends a coarse grind.

POUR OVER

The pour over brew method features a fine mesh stainless steel filter that eliminates need for paper filters. Paper filters actually absorb the coffee's essential oils hence robbing coffee of true flavor, plus no paper filter means no waste!

Note: For the pour over brewing method, BODUM recommends a filter coarse grind.

VACUUM/SIPHON

The vacuum/siphon brew method has fascinated generations of coffee drinkers with its theatrical technique. Water heats in the lower chamber, creating vapor pressure that forces the boiling water up to mix with coffee grounds. The coffee maker is then removed from the heat and vacuum/siphon pressure draws the brewed coffee downward through a strainer, and into the bottom chamber for serving.

Note: For the PEBO® vacuum/siphon brewing method, BODUM recommends a filter coarse grind.

COLD BREW

Quality cold brewed coffee can be made using essentially the same steps. Instead of hot water, add filtered water at room temperature and stir. Place the lid on the carafe and let brew for 12–24 hours at room temperature or in your refrigerator. Press and enjoy!

Note: For the French Press brewing method, BODUM recommends a coarse grind.

CHAMBORD® is a true original. The iconic design, now synonymous with the BODUM® name, dates back to the 1950s. To this day we continue to produce the CHAMBORD® with the same artisan craftsmanship of yesteryear, but with a focus on environmentally responsible manufacturing in our BODUM owned factory in Portugal. The French Press system continues to be a greener way to brew coffee with the truest flavor possible.

BODUM® has designed and built many different French presses. There is one for every taste and color preference and one for every budget. And yet, no matter how different their outer shell, they all share the same inner quality: the French Press offers the least invasive way to get from bean to cup. Roasters love using the French Press to test the quality of their coffees as it is the purest coffee brewing process around.

The vacuum brewing method has long been known to deliver an abundance of taste through sheer simplicity and pure materials like borosilicate glass. Its exceptionally effective vacuum brewing method extracts all precious oils of your favorite coffee. The vacuum brewing process is entirely sealed off so no aroma can escape. In addition, the brewing time and temperature are perfectly calibrated, ensuring a perfect cup of coffee with each brew.

Milk frothers turn your daily cup of joe into a coffee-house specialty with the push of a button. Become the ultimate barista at home by creating airy foam and froth in seconds. Not to mention you can use these handy tools on any light mixing job including salad dressings, protein drinks and cocktails. For best results use ice cold, non-fat or low-fat milk.

CHAMBORD® CLASSIC TEAPOT

ABOUT TEA

No wonder tea has been the most popular drink after water for centuries. Black teas, white teas, green teas, herbal teas, fruit teas, rooibos teas – the options for pleasure and delight are simply limitless. We have the right tea maker for all of your tea preferences, including iced tea. Tea brewing doesn't get any purer than with the BODUM® Tea Presses. With this unique system your tea is brewed precisely to your desired strength and aroma. We developed the Tea Press in collaboration with the English Tea Council over 30 years ago and we've been perfecting it ever since.

BODUM® Tea Presses are made of the highest quality borosilicate glass – a material that doesn't stain and is absolutely neutral in taste. The glass allows you to observe the brewing process and stop it when it's exactly right. It's just fascinating to see all the beautiful tea colors come to life. The BODUM® Tea Presses are as much a pleasure for your eyes as they are for your taste buds.

VARIETIES OF TEA

BLACK TEA

One of the most known varieties of tea is black tea. It is made from the teaplant *camellia sinensis/assamica* and amongst the most popular in Europe and North America. After harvest, the tea leafs are allowed to oxidize to the fullest, so that the freshly plucked leafs slowly turn brownish and darker. The flavour is usually stronger, than other types of tea, but can also vary from light and floral himalayan first flush to strong and malty assam teas.

90-96°C
195-205°F 2-3 min

ROOIBOS TEA

Only a very limited area in the Cedar mountains, in the heart of South Africa is capable of providing the right soil and climate to grow rooibos. Being used for centuries by the local people, the rooibos cultivation and processign started only a few hundred years ago. Now the bush is treated nearly the same way, as it has been for decades. The bush is allowed to ferment after harvest, giving the tea it's disctinctive sweet and red cup.

90-96°C
195-205°F 5-6 min

GREEN TEA

The freshly plucked leafs of the tea plant *camellia sinensis* must be heating directly after harvest, to prevent the leafs from oxidization and becoming black tea. Traditionally heating in iron pans in China, the Japanese have developed a hot water steam heating to prevent the tea from burning. Both methods create a distinct flavour for each region, that can vary from light, floral, sweet to full bodied and slightly toasted.

70-80°C
158-175°F 1-2 min

WHITE TEA

Coming from the same plant as green or black tea, white tea is the one with the least human effect during production. Only the youngest and most fragile buds are harvested by hand and left to dry under the sun. No oxidization or heating is done to preserve the full natural character of the white tea. The name derives from the fuzzy white appearance of the young tea leaves.

70-80°C
158-175°F 4-6 min

FRUIT TEA

Commonly used in Europe, dried fruit pieces and other parts of suitable plants have been brewed with hot water into fruit tea - or tisane - for thousands of years. The basic fruit tea consists of apple, orange, hibiscus and rosehip and is given a special twist with whatever exotic fruits and ingredients is added to it. Fruit teas are naturally caffeine free and make the perfect iced teas for children!

90-96°C
195-205°F 5-6 min

TEA BREWING METHODS

TEA | 40

TEA PRESS

The Tea Press utilizes the same brewing system as the French Press to allow for full control of the tea steeping process. Once your preferred coloring and strength is reached, you simply press down the plunger and seal the tea leaves into the bottom part of the filter that has no holes. This makes the brewing process stop with one easy push and you can discard or re-use the tea leaves after you have enjoyed your beverage. Silicone rim secures filter firmly into the teapot and stays cool to the touch for safe removal.

Note: All loose leaf teas are suitable for the BODUM® Tea Press. The Tea Press works best with fruit teas and black tea because it interrupts the brewing process – avoiding bitterness.

TEAPOT AND TEA INFUSER

Tea leaves can be left to swirl freely in the infuser to develop their full flavor, and can be left to brew without interruption. The filter, along with the tea leaves, can be removed at any time to stop the brewing process and can even be used a second time to re-infuse quality loose leaf tea. The highest quality green tea, for example, can be reused up to four times. The CHAMBORD® Teapot comes with a wide filter basket in the borosilicate glass bowl which lets the tea leaves swirl freely and gives them the space they need to live up to their full aroma potential.

ASSAM TEA PRESS WITH BAMBOO HANDLE

- ⊗ No paper filter!
- ⊗ No capsule!
- Stainless steel pot
- BPA-Free
- Dishwasher safe

BODUM® COLUMBIA pairs utility with timeless elegance. Highly polished stainless steel and classic design make this the perfect choice for entertaining and gifting. The French Press brewing system allows for full control over the tea steeping process. The silicone gasket locks the tea leaves into bottom of the filter once brewing is complete, cutting off access of water to the tea leaves. This allows tea to be used multiple times.

- BPA-Free
- Made in Europe
- Dishwasher safe

The ASSAM Tea Press is the icon among the wide variety of BODUM® Tea Presses. Its classic round shape and borosilicate glass let all teas shine in their best light. Contrary to non-transparent pots, the glass pot allows the distinct color palates to be viewed as they are a big part of any tea lover's delight. There is also a very practical reason for making glass the preferred staging ground for your teas: You have precise control over the extraction and strength of the tea as the color's intensity indicates how far along in the brewing process.

Ice Tea Jugs are great for all occasions, during hot summers as well as cold winters! With the popularity of flavored water, spare the expense and added sugars by making your own natural cold-brew iced tea, flavored-infused water, and even sangria, at home. All parts are dishwasher safe and can be put in the fridge.

ABOUT CORK

BODUM has a new design line with cork. One of nature's most beautiful and functional materials. Cork comes from the bark of cork oak that is a bit of a miracle in itself. Each 9 years you can harvest all the trees' bark so that it is completely naked. Without damage. The tree generates new bark and can grow up to 200-300 years old. Cork oak grows in the Mediterranean region, not least in Portugal, which supplies about half of all the cork that is used in the world. We know the cork from wine bottles plugs, but because cork has so many good qualities, it also moved into the home. Cork is thermal insulation, water and air-tight, elastic, light and soundproofing. And it is beautiful to look at and smooth to touch. Cork is a 100% natural and sustainable material. And we have almost the cork-trees standing just outside the windows. All BODUM products are produced namely in our own factory in Portugal, where environmental responsibility already has the highest priority.

ABOUT DRINKWARE

BODUM premiered its line of double wall glasses in 2004. The inventive design coupled with timeliness style made these glasses an instant classic. Over the past years, the collection has earned numerous awards and expanded to include a variety of styles and sizes. Made of heat-resistant borosilicate glass, and individually mouth-blown by expert artisans, the double wall construction creates a highly effective layer of insulation. Hot drinks stay hot longer, while the glass remains cool to the touch, and cold drinks stay cold without producing messy condensation. The result is endless serving possibilities. The patent pending hydrophobic silicone vent at the bottom of each glass equalizes pressure within the walls of the glass with the outside air pressure. The glass will self-adjust to any temperature liquid, and the vent is only permeable to air, not water, so whether your beverage is hot or cold it will never allow fluids into the interior of the glass layers.

The BODUM® Double Wall Glasses have won the following awards:

-  Microwave safe:
up to 350°F/180°C
-  Oven safe:
up to 350°F/180°C
-  Dishwasher safe:
Do not place glasses into a
crowded dishwasher.

Made of heat-resistant borosilicate glass, and individually mouth-blown by expert artisans, and therefore each may have slight differences in height, thickness, and weight. The double wall construction creates a highly effective layer of insulation, hot drinks stay hot longer, while the glass remains cool to the touch, and cold drinks stay cold without producing messy condensation. The result is endless serving possibilities.

ABOUT OUTDOOR

BODUM® has an array of BPA-free plastic products that are perfect for outdoor and poolside service. Introducing our new collection of shatterproof outdoor tumblers made from an extremely durable polycarbonate that won't crack, shatter, break, cloud or discolor. The characteristics of polycarbonate compare to those of polymethyl methacrylate, but polycarbonate is stronger and will hold up longer to extreme temperature. Polycarbonate is highly transparent to visible light, with better light transmission than many kinds of glass. These Outdoor Tumblers have the same thermal properties as our glass versions, so your hot drinks will stay hot and cold drinks will stay cold for a longer period of time and with no messy condensation rings to worry about! Crystal clear design for the outdoors. We'll toast to that.

PAVINA® OUTDOOR is a crystal clear lightweight double wall tumbler designed for the outdoors. Ideal for everyday use and functional for large outdoor barbeques. We have recently invented a new technique for the production of our double wall tumblers by using shatterproof plastic. The tumblers are produced in one whole piece - no welding and no possibility of leaking - and even better than that, it is all done in a sustainable way.

DOURO COLLECTION

ABOUT DINNERWARE

Discover the broad selection of elegantly designed porcelain and complete your home's repertoire of sophisticated dinnerware. You'll find single pieces that are easy to mix and match, as well as complete porcelain dining sets that will give your table a new look. Each piece's smooth, elegant form and considered functionality can be simply appreciated. Stage your breakfast already with an opulently decorated breakfast table, enjoy a delicious gazpacho from our well-proportioned soup plates or arrange a wonderful meal on the individual pasta or gourmet plates. A clean, white plate can become a canvas for either inspired culinary artistry or perfectly ordinary weekday meals. After all, there is beauty in the mundane. And imagine picking up the same plate years later and seeing, reflected in the smooth, white surface all the good meals and good times enjoyed. No limits are set to the imagination when it comes to this large range of choice and our series combinability.

Porcelain

The Douro Valley in Portugal is one of Europe's oldest and most beautiful wine regions. With the curved terraces of vines as far as the eye reaches, it has been the inspiration for the fine grooves in BODUM's new porcelain set DOURO. An elegant classic design that both black as white can stand alone. But which, in all its simplicity, can be mixed with other porcelain sets, make a soft contrast to glass and steel, or emphasize warm materials like cork and wood. DOURO is both designed and manufactured in Portugal. The country from which the story of the set began.

ABOUT STORAGE At the very top of most of our to-do lists: Get organized. We at BODUM® want to help you cross that off your list and have some fun while you're at it. Our storage collection – the beloved line of clear simplicity with its wide variety of sizes. There can't possibly be anything these storage jars won't hold and display beautifully. They can pretty much hold anything in your household and look good while they're at it – from pasta to peppers, from buttons to ribbons, and from Q-tips to hair pins. You'll feel so much better and so much more organized – we've got the right storage option for you. Something else you might want to store: your old excuses for not getting organized.

Borosilicate glass jar
Stainless steel lid
Made in Europe
Dishwasher safe*

BODUM's traditional borosilicate glass contains no lead and has a brilliance like no other industrial manufactured glass. The jar is sealed with a thin removable silicon gasket to keep it shut tight for safe storage. Thanks to this eye-catching lid shape and subtle sheen, this high-quality CLASSIC storage jar perfectly matches the CHAMBORD BODUM® line.

HOT POT BOWLS

ABOUT KITCHEN

Our kitchens have become the central hub of our living quarters – almost like the farm kitchens in Denmark used to be, the country where BODUM was founded. They're the place where everything happens, where everybody meets, where discussions are held and beans are spilled. The kitchen is no longer a cordoned off place that feeds what's going on in the living room. Today's kitchen is the living room, it's where everybody ends up anyway. And that's a good thing – we want them to see the whole range of beautiful BODUM® products at work after all.

ABOUT E-BODUM

e-BODUM® inspires you to build a collection of power tools that reflect our core principle: Good design has to be functional and affordable. Once you see past the good looks of e-BODUM®, each product's attributes and performance will make you a loyal fan! Not only will you appreciate the award-winning design of these products, e-BODUM® will bring the power and innovation necessary to make kitchen duty a breeze!

Capacity 4.7l, 5Qt, 160oz

Measurements 234 × 397 × 343mm

Material plastic, silicone, rubber, stainless steel, non-stick coated cast aluminum, chrome-plated steel

Rating Europe

700W, 220-240 V, 50-60Hz

The Stand Mixer comes with the following attachments:

- 1 Stainless steel mixing bowl
- 1 Dough hook
- 1 Beater
- 1 Whisk

STAND MIXER

- Powerful 700W, 7 speed motor delivers up to twice the power of traditional stand mixers.
- Rotating attachment head provides orbital movement, maximizing capture surface for thorough mixing.
- Includes 3 attachments: Dough hook, ideal for bread and pizza doughs, rolls and sweet bread dough; Beater for cake batters; Stainless steel whisk for beating egg whites, cream and cocktail sauces. Attachments and mixing bowl are dishwasher safe.
- Lift-assist mixer head locks into place during use with lever for easy release.

BISTRO

Stand Mixer

Effortlessly takes care of blending, mixing, and kneading your dough as well as whipping cream and beating egg whites.

The Hand Mixer comes with the following attachments:

2 pcs Beaters set
2 pcs Dough hooks set

HAND MIXER

- Its five powerful speeds can handle anything from blending a simple sauce to kneading a bread dough.
- Includes two stainless steel attachments: Beaters to blend, mix and puree (whipping cream, beating egg whites and blending cocktail sauces); Dough hooks to knead cake batters, bread or pizza doughs.
- Slip-proof silicone feet allows the mixer to stand upright on its own.
- Speed control button that slides for one-handed mixing.
- The stainless steel attachments are dishwasher safe.
- Handy in use and space efficient in your kitchen cabinet.

BISTRO

Hand Mixer

This handy Hand Mixer can handle anything from whipped cream to mashed potatoes, kneading bread dough or mixing cake batters.

DOUBLE WALL WATER KETTLE

- Five temperature settings perfect for different kinds of teas: 60°C/140°F, 70°C/158°F, 80°C/176°F, 90°C/194°F and boiling.
- The inner glass wall is made of borosilicate glass, the outer one of transparent plastic. It protects the glass, insulates, and keeps you from burning your fingers.
- The water only comes in contact with glass – the process is therefore BPA-Free.
- Mesh-screened spout captures chalk while pouring.
- The transparent container makes it easier to control the water level. The scale line indicates liters, ounces and cups.
- Manual On/Off switch plus temperature sensor for automatic shut off and added safety.
- Keep warm for up to 30 min.

BISTRO

Double Wall Water Kettle

This BISTRO Water Kettle can be set and held at desired temperature for up to 30 min! Ideal for maintaining optimal brew temperatures for your teas!

BURR COFFEE GRINDER

- This space-saving grinder holds an amazing 220gr of coffee and therefore allows for larger quantities in one go.
- 12 settings allow you to grind from a coarse French Press to a fine espresso with the ability to micro-adjust between settings.
- Programmable time function for even easier handling.
- The wide open funnel prevents spilling of the beans.
- Tightly fitting plastic lid keeps the grounds from spilling.
- Equipped with a friction clutch, preventing damage to the grinding gear by the presence of small stones.

BISTRO

Burr Coffee Grinder

Grinder crushes beans between stainless steel conical burrs rather than slicing them which preserves bean's intrinsic flavor and aroma.

BEAM HEATER

- The beam heater is specially designed for heating siphon coffee makers more safely.
- Generates a more consistent heating resource over alcohol lamp or butane burner.
- Good insulation, corrosion resistance, abrasion resistance, heat resistance.
- Switch the heater off after four minutes, and the brewed coffee passes through a filter and back into the globe. The result is a well-rounded brew with the toastiness of French press, minus the grit.
- Use the control knob to fine-tune the temperature you desire.
- After brewing, the heater can also be used to keep the coffee warm above its seductive glow.

MOCCA

Beam Heater

A powerful 430-watt halogen lamp and precise dial control will allow you to tune your heat for a perfect siphon brew.
