KYOTO CERAMICS

ABOUT US

The Japanese technology corporation Kyocera was founded in 1959 as a small suburban workshop and is a highly diversified global enterprise with over 80,000 employees today.

Kyocera started producing kitchen knives with blades made of zirconia ceramics as early as 1984 in Sendai, Japan, making us one of the pioneers. We are proud to celebrate 40 years as market leader in the field of ceramic kitchen products in 2024.

Our long-standing experience in the field of fine ceramic materials is applied to the production of high-quality, robust and sharp ceramic knives.

The special properties of Kyocera ceramic knives make cooking a pleasure: the dense and smooth surface of the blade allows for the most precise cuts, the extreme hardness of the material ensures above-average edge retention, plus they are amazingly light, extremely flexible and corrosion-free. They are the ideal tools for preparing food.

SUSTAINABILITY

Sustainability is becoming increasingly important to protect our planet. Kyocera is contributing to a greener environment and by changing all the product packaging subsequently.

The newly designed, high-quality packaging is now completely plastic-free which is thus a step further to make our production more sustainable and contribute to a environmentally-friendly world by reducing plastic waste. By removing the plastic the packaging is weight-reduced additionally and therefore decreases CO₂ emission during transport. Not only plastic, but also packaging that is not necessary for transport has been consistently removed.

Kyocera's sustainability initiatives reflect the philosophy of its founder, Dr Kazuo Inamori. His lifelong belief is that "people have no higher calling than to strive for the greater good of humankind and society."

HISTORY

The legacy of KYoto CERAmics kitchen products.

1984
 Kyocera debuts a ceramic kitchen knife at **Kyoto** fair.

2001
Kyocera ceramic blades stay sharper longer than high carbon and stainless steel, proven in an industry-standard cutting test.

2003
Kyocera **Kaizen** reduces energy consumption in Sendai, Japan where the knives are made.

2022
Kyocera files patents in 4 countries for Z212 the world's highest quality ceramic material, with **2x more** wear-resistance.
Kyocera files 34th patent for proprietary ceramic knife tech and for the 7th year named among Clarivate's **Top 100 Global Innovators**.

..... **1987-88**
 Kyocera engineers a sharpening and buffing method that is the foundation of handcrafted, **JAPAN-QUALITY** sharpness.

..... **2003**
Kyocera's **rounded-edge** geometrics patent is filed and establishes its signature knife design.

..... **2020**
Award-winning designer **Yohei Kuwano** collaborates with Kyocera on a new design inspired by Japanese hammers.
Kyocera ceramic knife shipments exceed **20 Mio.**, globally.

..... **2023**
CHOWA SERIES launches as the latest in ceramic knives with improved durability & performance.

Follow us on our journey through the world of fine ceramics and the milestones of Kyocera kitchen products development during the last 40 years.

ADVANCED CERAMICS BENEFITS

Kyocera's high standards of technology and quality result in ceramic knives with a timeless aesthetic combined with cutting precision. The unique properties of Kyocera ceramic knives make cooking a delight: the dense and smooth surface of the blade allows for the most precise cuts, the extreme hardness of the material ensures above-average edge retention, plus they are amazingly light, flexible, and corrosion-free. They are the ideal tools for meal preparation.

No corrosivo

Lightweight
Sehr leicht
Une extrême légèreté
Ligero y bien equilibrado

Easy handling
Einfache Handhabung
Manipulation facile
Fácil de manejar

DOS + DON'TS

To ensure that you have many years of pleasure from our high-quality knives, please note: ceramic knives are easy to clean and are best washed by hand. Knives with plastic handles are generally suitable for dishwashers. Please ensure that the blades are protected when stored to avoid damage. Only use cutting boards made of wood or plastic. Do not use ceramic knives forcefully or to chop, debone, or cut frozen food. Do not twist or torque the knife blade. Do not let the blade fall on a hard surface. Store all kitchen knives in a knife block for safety. We recommend using a Kyocera blade guard for this purpose. For further details visit:

www.kyocera.eu

Sharp performance

Supporting traditional handcrafts, the Japan Series is manufactured by expert artisans in small suburban workshops in Seki (Japan), the city of knives. The unique handle shape provides a natural, ergonomic feeling, contoured to the palm and ultimately enhancing the cutting performance.

After more than 10 years of research and development, we have succeeded in developing a new material, "Z212" zirconia ceramic which has been patented in 2022 and is significantly harder than conventional Kyocera ceramics. The abrasion resistance is further improved, so the sharpness of the blades lasts more than twice as long as that of the previous model.

All our knives are handsharpened, the handmade Pakkawood handle makes every product a unique item. The whole series is made in Japan.

Japan Series

Relaunch | available from summer 2025

Chef's Knife
Product **JPN-180NBK**

Pure aesthetics

The Japanese word “shin” can mean new, honest or true. The Shin series will exemplify these values with its innovative and exceptionally precise ceramic blade. The Shin Black series features an extremely durable Z212 ceramic blade, which remains sharp for twice as long as other ceramic blades from Kyocera, thanks to an innovative new production method. The knives from the Shin series also feature an ergonomic handle that enables an even more comfortable grip as well as greater control. Since summer 2022, the Shin Black series is allowed to carry the patent seal. The Z212 blades of the Shin Black ceramic knives were proven to maintain razor-like sharpness twice as long as traditional ceramic knives (based on internal Kyocera testing).

 Material Z212 ceramics, plastic
 EAN 4960664905157

Pure harmony

The Japanese word “chowa” stands for the pursuit of harmony, which is visible in the iconic knife series through the harmony of Japanese craftsmanship tradition with technical know-how. Made of Kyocera’s patented Z212 zirconia ceramics, the blades retain their sharpness twice as long as other Kyocera ceramic blades. The soft-touch handle, inspired by the traditional Japanese hammer, fits smoothly in the hand and prevents wrist fatigue with its ergonomic shape.

- ▶ Handle made from organic plastic obtained from sugar cane
- ▶ Reduced usage of fossil fuel derived plastic (compared to our conventional knife handle)
- ▶ Reduced production related greenhouse gases, such as CO₂ (compared to our conventional knife handle)
- ▶ No plastic packaging
- ▶ Ecologically friendly new high-tech product

Unparalleled sharpness

For meat-lovers there's nothing better than a perfectly grilled, tender, and juicy steak. In order to maintain perfection and maximum enjoyment from preparation right through to dining, Kyocera steak knives, with their extra-sharp, micro-serrated ceramic blades, facilitate clean and effortless cuts without the need to exert excessive force. Their elegant appearance and ergonomically shaped handle add sophistication to any table setting.

Perfect companion

Take your hot or ice cold beverages anywhere you go with Kyocera's ceramic interior coating, double wall vacuum insulated stainless steel travel mug. The ceramic interior coating prevents flavour transfer when used with different beverages such as coffee and tea and effectively prevents stains or corrosion.

Travel Mugs

The entire collection features long temperature stability, superior safety, easy use, durable materials, and a beautiful design.

- ▶ The ceramic interior coating is fruit acid resistant and flavour saving.
- ▶ The stainless steel double insulated walls ensure long temperature stability.
- ▶ The removable ice stopper insert of our "Twist Top Series" and "Slim Mug Series" (500 ml) makes drinking, cleaning and adding ice cubes easy.
- ▶ Our "Flip Top Series" enables one-hand operation for opening and closing, the safety lock prevents the flip lid from accidentally opening.

Cold for 24 hours
Hot for 12 hours

Fruit acid resistant

No metallic taste thanks to unique
ceramic-coated technology

Shock resistant

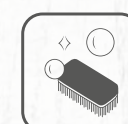

PFAS (PTFE, PFOA) and BPA-free

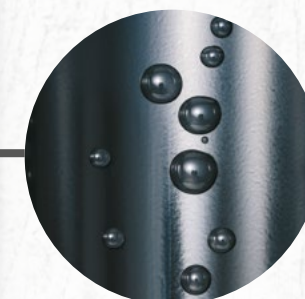

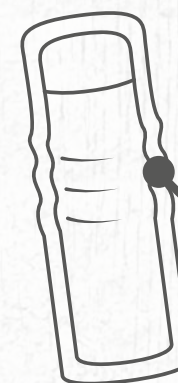

Rustproof

Ecologically friendly

Easy to clean

Vacuum insulated double wall,
with flavour protecting ceramic
interior coating

Healthy cooking

The Kyocera cookware has been designed to combine healthy cooking with sustainability. The ceramic-coated frying pans and pots offer an optimum cooking experience without any manufacturing-related harmful substances being released while cooking. The high-quality and easy-to-clean ceramic coating guarantees frying food without burning thanks to excellent non-stick properties. The 3-layer base provides optimum heat distribution, thereby speeding up the cooking process and saving energy. The food is heated evenly and stays warm for longer after cooking.

RESHARPENING

Kyocera ceramic knives retain their exceptional sharpness for an extremely long time. Should you see microchips on the cutting edge over time, the knives can be easily resharpened with special diamond grinding wheels. You can either use our diamond wheel sharpeners or take advantage of our authorised Kyocera resharpening service for an expert result. Further information is available at www.kyocera.eu

KYOCERA KNIVES - FIND YOUR PERFECT MATCH

Finding the perfect knife is not that easy. Kyocera's model finder offers the possibility to compare knives and select the best knife from the different series based on their main features.
